Canon Rebel Basic Information

By Josh Harris
Media Resource Librarian
The Canon EOS Rebel T6i is a very advanced DSLR with a robust set of features:

- 24.2 Megapixel CMOS Sensor for incredible detail and accurate color representation
- DIGIC 6 Image Processor which provides greater light sensitivity and higher resolution images
- Built-in Wi-fi for instant upload
- Built-in NFC for pairing with iOS or Android devices
- The ability to shoot Full HD (1080p) at 24 and 30 fps
- Touch-screen controls
- 19-point auto focus system
- High-speed continuous still image shooting, up to 5 fps
