Streaming Resources from HPU Libraries

By Samantha Leonard
Media & Digital Resource Librarian

August 2013
Learning Objectives:

• Learn definition of streaming video
• Learn about HPU Libraries streaming video subscriptions
• Learn about uploading and embedding streaming videos into CMS (content management systems) such as Blackboard
HPU Libraries Media Website
http://library.highpoint.edu/media/media.html

Streaming Content at HPU LibGuide/Website
http://guides.highpoint.edu/content.php?pid=462197
Films for Humanities

Can search through the Films for Humanities Website.

You can access the HPU portal of the Films for the Humanities website through:
• Streaming Content LibGuide/Website
• HPU Libraries Online Resources

You can search through collections or search box

You can email video, create playlist and favorites, embed video, and receive a citation

HPU Libraries
Films for Humanities

You can also find Films for Humanities videos through searching in the HPU Library catalog and then selecting the “eVideo” type and “View Now” option.

You can also specify your search result format to “eVideo.”
Swank Digital Campus

Swank Digital Campus Website
http://www.swank.com/digitalcampus/index.html

Instead of putting a DVD on reserve for a class, consider putting a film on reserve through a streaming URL for your students to watch at home.
Swank Digital Campus

Swank Digital Campus Website
http://www.swank.com/digitalcampus/index.html

What can you do with Swank in your classroom?

• Students can legally view course-assigned feature length films outside of classroom, with no limit on how many people can view the streaming video for the whole semester.
• If you find films through searching on their website (listed above) please send your list to Sam Leonard (sleonard@highpoint.edu).
• A PDF of URLs will be put on your course reserve website and students can copy and paste the URLs into their browsers at home.
Embedding Streaming Video
BlackBoard

Go to your course page

You can add a video to content or discussions for your students to comment on.
Embedding Streaming Video
BlackBoard

On content, Build Content and Create Item.

Name your video and select the HTML Code View option in your menu bar.
Embedding Streaming Video BlackBoard

Copy and paste the embed code from the video streaming website into the HTML code view and select Update.
Embedding Streaming Video

BlackBoard

• Nothing will appear in your text box, but do not worry!
• Go ahead and submit your item with a title and other desired settings.
• Now refresh your browser and go back to content – your video will appear in the content bar.
For more information on uploading videos to YouTube, embedding through PowerPoint, and more please visit the Media Tutorials LibGuide/Website
